

INVITATION!

Estonian Recycling Competence Center/Waste Recycling Cluster and Estonian Asphalt Pavement Association/Road Cluster are pleased to invite you to the International Conference in October 9-10, 2014 Tallinn, Estonia.

This conference aims to:

- Promote reuse and recycling of construction and demolition waste
- Promote use of recycled aggregates
- Exchange knowledge and practical experiences

**October 9-10, 2014
Tallinn, Estonia**

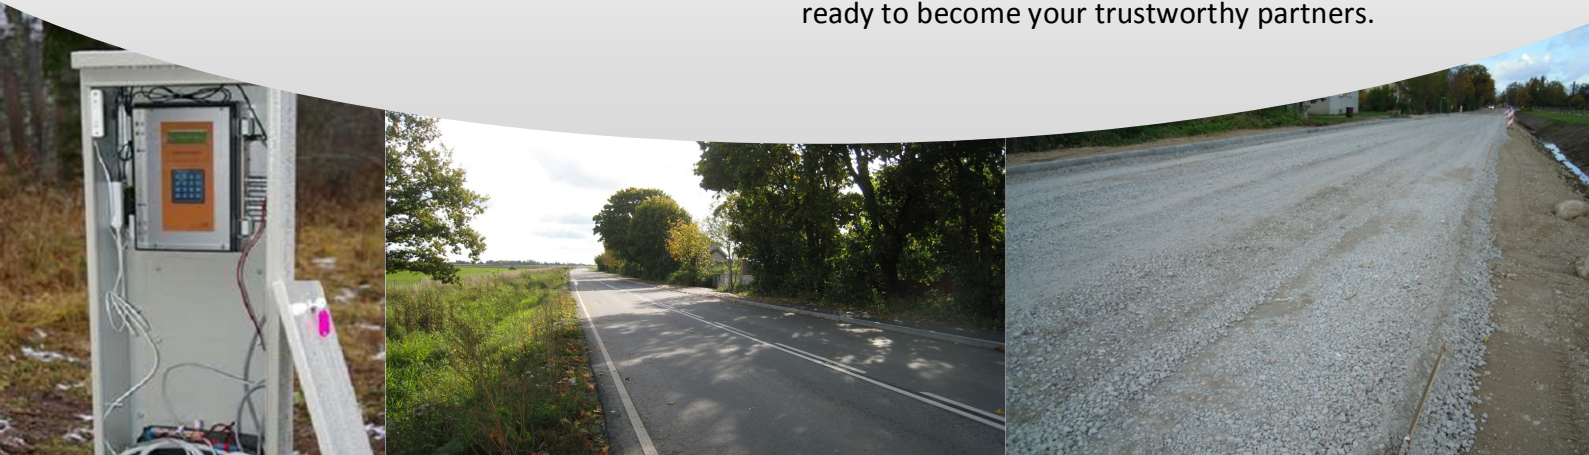

The Estonian Waste Recycling Competence Center is the outcome of the cluster project—Estonian Waste Recycling Cluster and was founded in September 2013 as non-profit organisation with the aim to increase waste recycling in Estonia and to support waste recycling companies in producing from waste high quality and certified materials.

The activities of the Estonian Waste Recycling Competence Center are focused on development of different waste recycling projects (incl. international projects), trainings for all stakeholders in waste management/recycling and also sharing internationally the experiences of Estonian companies in waste recycling.

In the beginning of 2013, the Estonian Road Cluster was set up with the Estonian Asphalt Pavement Association non-profit association, uniting different parties of the road construction supply chain – from design and construction to materials suppliers, education and research institutions and professional organisations.

The Estonian Road Cluster aims to enhance the competitiveness of the companies through innovative solutions as well as to establish a competence centre for the road construction sector that would combine best practices and know-how of the industry. There are 22 partners in the Estonian Road Cluster. These companies are important players in road industry and they are ready to become your trustworthy partners.

AGENDA

Thursday—October 9th, 2014

Venue: Tallinn TV Tower

Moderator: PhD Mait Kriipsalu, Estonian University of Life Sciences

Language: English

9.30 – 10.00 Registration and coffee

10.00 – 10.15 Welcome

10.15 – 11.00 Quality management of mineral recycling products, use of recycled aggregates in Austria, experiences with green public procurement.

Dipl.-Ing. Martin Car, Der Österreichische Baustoff-Recycling Verband

11.00 – 11.15 Questions

11.15 – 11.45 Practical examples of the use of waste and by-products in infrastructure construction works.

Ville Niutanen, Lemminkäinen Infra Oy, Finland

11.45 – 12.15 Coffee

12.15 – 12.45 Viable recovery options for construction and demolition waste.

Christian J. Engelsen, SINTEF, Norway

12.45 – 14.15 LUNCH

14.15 – 14.45 Possibilities to use recycled aggregates in road construction works, practical examples from Estonia.

Ott Talvik, Tallinn University of Technology

14.45 – 15.05 Utilization of by-products of limestone industry in road construction.

Sven Sillamäe, TTK University of Applied Sciences

15.05 – 15.25 Results of the project OSAMAT.

Andres Brakmann, Ramboll Estonia

15.25 – 15.45 Overview of the research on use of oil-shale mining waste and oil shale combustion ash.

Marek Truu, Technical Centre of Estonian Roads

15.45 – 16.30 Panel discussions

16.30 Conclusions, the end of first day

Friday—October 10th, 2014

Visit to different pilot sites/test sites.

9.00 Tour starts from Tallinn

12.00 Lunch

15.00 Back in Tallinn
