

ASPHALT IN FIGURES 2016

VERSION 22-01-2018

EAPA is the European industry association which represents the manufacturers of bituminous mixtures, companies engaged in asphalt road construction and maintenance as well as the additive and equipment producers. It has the mission to promote the good use of asphalt in the creation and maintenance of a sustainable European road network. Conscious of the importance of providing information to the public, EAPA is pleased to present to you the data of 'Asphalt in Figures' for the year 2016.

*John Kruse Larsen
President EAPA*

**EUROPEAN ASPHALT
PAVEMENT ASSOCIATION**

KEY FIGURES OF THE EUROPEAN ASPHALT INDUSTRY IN 2016

In this overview, between a number of European countries, data refer to asphalt production, application and the use of binders. Furthermore several reference data on the road in general are given. The data have been established with the assistance of the members of the European Asphalt Pavement Association, and are at the moment the best available and reliable for the asphalt industry.

'No data' means no data are supplied or available, "...*" figure not provided but estimated. All mass figures are in metric tonnes. EU-28 means all member states of the European Union (EU).

WARM MIX ASPHALT (WMA)

PRODUCTION OF WARM MIX ASPHALT FROM 2013 TO 2016 (100-150°C)

For this table Warm Mix Asphalt is defined as mixtures produced by using special techniques and/or additives to reduce the production temperature. The production temperature is between 100°C and 150°C.
(in million tonnes)
